- ❑ Application utilizes Microsoft SQL Server Express
- ❑ Cemetery has approximately 15,000 graves
- ❑ Application Included:
  - Data Manager Module
  - GIS Mapping Module
  - Work-Order Module
  - Image-Retrieval Module

Erdman Anthony (**EA Maps, LLC**) custom-tailored a computer software application designed for the Town's cemetery managers and clerks. The application links all cemetery records to computerized maps allowing users to interact with the map and access data. The application was developed as a stand-alone application that does not require any additional software.

EA Maps is currently providing software maintenance to client under an annual agreement.
